Define Problem Statements (Customer Problem Statement):

Define the problems faced by college students while learning technical subjects. These problem statements capture the customer's point of view and help EduGenie focus on the challenges students experience when they need understandable answers, clear concept explanations, practice, summaries and structured learning guidance.

Problem Statements:

I am	I'm trying to	But	Because	Which makes me feel
------	---------------	-----	---------	---------------------

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A college student learning technical subjects.	Understand difficult concepts and get clear answers quickly.	Learning resources are spread across multiple sources and explanations may be difficult to follow.	The student has limited study time and needs focused, understandable learning support.	Confused and time-pressured when trying to learn or revise.
PS-2	A college student preparing for exams, assignments and projects.	Practise, revise content and follow a structured learning plan.	The student must switch between separate tools for quizzes, summaries and study planning.	There is no single learning workflow that combines these activities in one place.	Overloaded and less confident about what to study next.
