Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	4 Marks

Empathy Map

Understand the EduGenie customer/user from four perspectives — what the student Says, Thinks, Does, and Feels while facing difficulties in learning technical subjects. This helps the team design a focused, student-centered learning assistant.

SAYS • I need clear answers for my technical questions. • I want difficult concepts explained in simple language. • I need one place for revision and practice.	THINKS • I have limited time to study after college. • I am not always sure which topics I should study next. • Using many separate learning resources is difficult.
PERSONA NAME College Student <i>(Technical Learner)</i>	
DOES • Searches online for explanations and study material. • Uses different resources for quizzes, summaries and planning. • Revises concepts before exams and projects.	FEELS • Confused when a concept is difficult to understand. • Pressured when there is limited time for study. • More confident when learning support is clear and structured.
